

HOMESPACE

Decentralized NFT Metaverse
with Artificial Intelligence

homespace.is

OUR DECISION

We present a smart contract that constitutes betting mechanics for any card game applied to the popular game of Holdem poker. It is based on the smart contract we developed for Binance Hackaton and presented as a part of the gaming section of Homespace.is, a Virtual NFT Metaverse.

We're creating a decentralized virtual platform that allows you to be a part of a big virtual world - Homespace. You can interact with other users and AI personas, visit galleries, events, music concerts, lectures, and much more. During our participation in BSC Gamefi Hackathon@Russia&Eastern Europe, we aim to deliver a small part of our potential project - virtual poker rooms, where users can play, interact with other visitors, and have a deeply immersive experience.
